Section 1 Introduction

1.1 Purpose

This guide provides comprehensive instructions for setting up and operating the Inbound AI Voice Agent System developed by Qwickstep.ai for K.L. Briggs' home inspection business client. The system automates inbound call handling, appointment scheduling, and data management for Good Eye Home Inspections, integrating with Retell, Cal.com, Google Sheets, and n8n to streamline operations and enhance customer engagement.

1.2 Scope

This document covers:

- System configuration across Retell, Cal.com, Google Sheets, and n8n.
- Technical requirements, credentials, and configurations.
- Placeholder notes for visuals (e.g., screenshots, flowcharts) to aid understanding.

The guide enables independent operation of the system, with minimal reliance on Qwickstep.ai post-delivery.

Section 2 System Overview

2.1 Description

The Inbound AI Voice Agent System automates call handling for GoodEye Home Inspections, addressing inquiries, booking appointments, and managing customer data. Key components include:

- **Retell:** Powers the AI voice agent for professional, US-English call interactions.
- **Cal.com:** Manages appointment scheduling, synchronized with Google Calendar.
- **Google Sheets:** Stores call logs, customer details, and appointment data.
- **n8n:** Automates workflows for data integration and end-of-call reporting.
- **Knowledge Base:** Contains GoodEye Inspections' FAQs and website information for accurate responses.

The system supports 24/7 call handling, seamless scheduling, and scalable data management, reducing manual workload and improving customer satisfaction.

2.2 Workflow Process

1. **Inbound Call Handling:** The Retell AI Voice Agent answers calls, greets callers, and responds to FAQs using a knowledge base.
2. **Appointment Scheduling:** The agent checks availability via Cal.com, books three-hour inspection slots, and syncs with Google Calendar.
3. **Data Logging:** Call details (e.g., caller name, address, call intent) are extracted and stored in Google Sheets.
4. **Call Transfer:** Complex inquiries are transferred to a human agent.
5. **End-of-Call Reporting:** n8n workflows update Google Sheets with call summaries, transcripts, and outcomes.

Section 3 Retell Configuration

3.1 Updating the Transfer-Call Number

1. Open **Functions** → **Transfer Call**.
2. Replace the placeholder phone (+1-xxx-xxx-xxxx) with the destination number.

No further edits are needed to the other two functions.

3.2 Knowledge Base

- Location: **Retell > Knowledge Base > Good Eye Inspections**
- Sources:
 - Entire Good Eye Inspections website (crawled)
 - Custom Worded Documentation (find in shared Google Drive)

To update FAQs: Edit the Worded Knowledge Base document and re-upload to Retell.

Section 4 Cal.com Setup

4.1 API Key & Event Type ID

To configure appointment workflows:

1. **Event Type ID**
 - Go to **Cal.com > Good Eye Home Inspections**
 - Open the calendar link
 - Copy the number in the URL (e.g., 12345) → *This is your Event Type ID*
2. **API Key**
 - Navigate to **Settings > API Keys**
 - Click **Add**
 - Label the key and copy the generated token

These two values must be entered into n8n's **"Set Credentials" node with blue sticky notes** under both:

- Check Availability workflow
- Book Appointment workflow

4.2 Calendar Configuration

- Go to **Calendar > Assignments**
- Add inspectors by clicking **Add Member**
- Set assignment mode to Maximize Availability

Section 5 N8N Workflow Automation

5.1 Workflow Overview

Three workflows manage automation:

Workflow	Function
Cal.com Check Availability Tool	Queries Cal.com for open slots
Cal.com Book Appointment Tool	Books inspection slot
End of Call Reports	Logs call data into Google Sheets

5.2 Setup Instructions

1. **Open (check availability & book appointment) workflow**
2. Locate the “Set Credentials” node with a **blue sticky note**
3. Paste the following:
 - **Cal.com API Key**
 - **Event Type ID**
4. Click “Save”

Figure 1.0: “Set Credentials” node found in the tool workflows in n8n.

Section 6 Platform Credentials

Below are the login credentials for all platforms needed to run the AI Voice Agent System. Keep these secure and update passwords regularly.

- **Retell AI**

Section 7 Conclusion

The Inbound AI Voice Agent System for Good Eye Home Inspections is designed to automate core call handling, appointment bookings, and lead tracking processes. Once set up, the system can operate independently with minimal maintenance.
