# 01 Why You Only Pay When We Deliver

*How the math should actually work.*

If you've worked with a cold email agency before, you've probably had experience signing up with a \$3,000 to \$8,000 monthly retainer, leads either come in or they don't, and either way the invoice keeps showing up. It can feel like a lot of trust to extend upfront, especially before any results have landed.

We wanted to build something that just feels fairer. Every offer in this document is structured so you only pay when we deliver. Whether you choose a pure pay-per-performance model (you pay per lead or per appointment) or a monthly retainer with a hard guarantee (if we miss the number, you don't pay), the risk sits where it should - with us, not you.

## WHY WE CAN OFFER THIS WITH CONFIDENCE

01

### **We use it on ourselves first**

Cold email is how we sell cold email. Every campaign we run for clients is built on the same infrastructure we use daily to fill our own pipeline. We've already worked out what works (and what doesn't) before it ever touches your business.

02

### **Everything is under one roof**

Copy, list sourcing, infrastructure, deliverability, and daily ops all sit with our team, not stitched together across freelancers and offshore VAs. One team owns the outcome end to end.

03

### **Verticals already validated**

B2B SaaS, marketing agencies, coaches, consultants, and service businesses. You'll see results from different verticals in the proof section. The model travels because the fundamentals don't change.

## 02 Engagement Fit

*Cold email doesn't work for every business. Before we get into the offers, here's what makes a good fit.*

|                 |                                                                                                                                                                                                        |
|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market Size     | <b>10,000 to 15,000+ companies within the defined ICP. Smaller markets compress our runway and limit how far we can optimize.</b>                                                                      |
| Business Model  | <b>B2B. Your buyers use email professionally and respond to it as part of how they do business.</b>                                                                                                    |
| Customer Value  | <b>Average deal value of \$3,000+. Higher is better. Just one closed deal needs to pay back the engagement many times over.</b>                                                                        |
| Offer Demand    | <b>Clear, demonstrated demand for your product or service. We surface buying intent. We don't manufacture it.</b>                                                                                      |
| Sales Readiness | <b>You have the bandwidth and process to handle replies (pay-per-lead or leads retainer) or show up and close calls (pay-per-appointment or appointments retainer) the moment leads start landing.</b> |

*If most of these fit, we're probably a good match. If something's off, I'd rather say so now than start a campaign that won't work.*

## 03 The Four Offers

*Choose based on two questions:*

**01** *Do you want to pay per result, or pay a fixed monthly fee with a guarantee?*

**02** *Do you want to reply to leads yourself, or have us handle the replies and book meetings for you?*

### PAY-PER-PERFORMANCE

**01**

#### **Pay-Per-Lead**

\$78 per qualified lead. No setup fee. No monthly retainer.

We run the campaigns and you only pay for each verified, ICP-matched lead that demonstrates genuine buying interest. You handle the replies, the follow-ups, and the closing.

Best fit if you've got the bandwidth to respond and nurture leads quickly when they land.

**02**

#### **Pay-Per-Appointment**

\$348 per booked appointment. No setup fee. No monthly retainer.

We run the campaigns, handle the replies, qualify each prospect, and book meetings straight onto your calendar. You only pay for appointments that land.

Best fit if you'd rather stay focused on closing and let us own the front of the funnel end to end.

## MONTHLY RETAINER

03

### **Leads Guaranteed**

\$1,888 per month. 25 qualified leads guaranteed or you don't pay.

Fixed monthly fee, locked in. We commit to 25 qualified, ICP-matched leads every month. If we miss the number, that month is free.

Best fit if you want predictable pricing, handle replies in-house, and prefer a fixed budget line item.

04

### **Appointments Guaranteed**

\$3,088 per month. 10 booked appointments guaranteed or you don't pay.

Fixed monthly fee, locked in. We commit to 10 booked appointments every month, replies handled and meetings booked straight onto your calendar. If we miss the number, that month is free.

Best fit if you want the fullest hands-off experience: predictable cost, calendar filled for you.

### **All four offers exclude infrastructure**

Domains, mailboxes, sending platform, verification, and scraping tools are paid directly to vendors. You own everything. We tell you exactly what to buy and manage every tool in the stack for you. See Section 05.

## 04 All Four Offers at a Glance

*Side by side. Pick the column that fits your business.*

|                | PAY-PER-PERFORMANCE         |                                    | MONTHLY RETAINER                  |                                          |
|----------------|-----------------------------|------------------------------------|-----------------------------------|------------------------------------------|
|                | Pay-Per-Lead                | Pay-Per-Appointment                | Leads Guaranteed                  | Appointments Guaranteed                  |
| Price          | \$78 / qualified lead       | \$348 / booked appointment         | \$1,888 / month                   | \$3,088 / month                          |
| Guarantee      | Pay only per lead delivered | Pay only per appointment delivered | 25 leads / month or you don't pay | 10 appointments / month or you don't pay |
| Reply handling | You handle                  | We handle                          | You handle                        | We handle                                |
| Setup fee      | None                        | None                               | None                              | None                                     |

*No setup fees on any offer. Infrastructure (Section 05) is covered separately, directly to vendors.*

## 05 Infrastructure — What You Cover

*Cold email runs on a stack of third-party tools. You own the stack directly, pay the vendors directly, and keep all of it if you ever stop working with us. This applies across all four offers.*

### WHAT YOU PAY FOR (PAID DIRECTLY TO VENDORS)

01

#### Sequencer

Instantly or Smartlead. Roughly \$97 to \$200 per month depending on volume. This is where your campaigns are run from.

02

#### Domains and mailboxes

Around \$10 per domain, \$4 per mailbox. Exact volume depends on send rate. We'll calculate what you need during onboarding.

03

#### Email verification

MillionVerifier or similar. Pay-as-you-go, usually under \$50 per month. Cuts bounces before they tank deliverability.

04

#### Scraping and enrichment

Apify, AnymailFinder, and similar. Pay-as-you-go based on list size. This is what powers the data behind every campaign.

Total infrastructure cost: \$300 to \$600 per month, depending on send volume. We tell you exactly what to buy, walk you through setup, and run every tool for you. You own all of it. If we ever part ways, you keep your domains, mailboxes, sending platform, and campaign history.

**You should own your own software. Always.**

Bundling infrastructure into our fee would create dependency, not value. If we ever part ways, you walk away with an asset, not a hostage situation. That principle sits at the centre of how we build this.

## 06 What Counts as a Lead

A unique individual who matches your ICP and gives a clear, positive response indicating interest in your product or service as a direct result of campaign outreach.

01

### **ICP match**

Matches the agreed criteria including job title, company size, industry, and geography.

02

### **Demonstrated intent**

At least one of: requests pricing, asks for more information or a link, asks relevant qualification questions, or expresses interest in discussing services.

03

### **Real and unique**

A real individual, not a generic inbox or role-based email. Not duplicated or previously counted.

## EXCLUSIONS

Just so we're aligned upfront, here's what doesn't count toward your billable total. These are on us, not you.

- Contacts outside the agreed ICP
- Students, freelancers, or vendors (unless explicitly included in ICP)
- Spam or bot responses
- Automated replies or out-of-office messages
- Duplicate contacts
- Responses unrelated to the offer
- Negative or non-committal responses

## 07 What Counts as an Appointment

*How appointments are defined and counted under pay-per-appointment and the appointments retainer.*

01

### **Scheduled on your calendar**

The meeting is confirmed and visible on the calendar system we have access to. Shared source of truth, no disputes about what was booked when.

02

### **ICP match**

The lead matches the agreed Ideal Customer Profile, including job title, company size, industry, and geography. If someone slips through who isn't a fit, that one's on us and it doesn't count toward your billable total.

### **SHOW-UP RULE**

Once an appointment lands on your calendar, our part of the work is done - we've sourced the lead, qualified them, handled the back-and-forth, and got the meeting booked. From there, what drives whether they show up is the pre-call nurture: reminders, confirmations, and follow-ups in the days leading up to the meeting. That part lives on your side, and we can help you set it up properly during onboarding so you have it dialed in from day one.

Because show-up depends on the work that happens after the booking (which isn't something we control), bookings count as billable appointments whether or not the lead ends up attending. We're accountable for everything up to the booking, you're accountable for the conversion from there.

### **RESCHEDULES**

If the same prospect reschedules once, twice, or even three or four times, it still counts as just one appointment. Same person, same conversation, same potential deal. You only get billed once, no matter how many times the meeting moves.

### **CANCELLATIONS**

If a prospect cancels with at least 48 hours' notice, the appointment doesn't count toward your billable total. That gives us time to either rebook them or replace the slot, so no harm done either side. If the cancellation comes within 48 hours of the meeting, we treat it the same as a

no-show — at that point the slot is effectively gone, and the prospect is unlikely to come back to it.

## 08 How the Retainer Guarantee Works

*Retainer offers (Options 03 and 04) include a hard performance guarantee. If we don't hit the agreed monthly number, you don't pay for that month.*

01

### **Leads guaranteed — 25 per month**

Option 03 is \$1,888 per month, billed at the start of each month. We commit to 25 qualified, ICP-matched leads landing in your inbox within that month. If we deliver 25 or more, the month is paid as normal. If we deliver fewer than 25, that month is refunded in full.

02

### **Appointments guaranteed — 10 per month**

Option 04 is \$3,088 per month, billed at the start of each month. We commit to 10 booked appointments landing on your calendar within that month. If we deliver 10 or more, the month is paid as normal. If we deliver fewer than 10, that month is refunded in full.

### **RAMP-UP PERIOD**

It takes 2 to 3 weeks to warm up your sending infrastructure. To keep the guarantee fair, the first month doesn't start when you sign - it starts the day campaigns go fully live. We'll confirm the start date in writing once warmup is done.

### **SWITCHING OFFERS**

If you start on a retainer and want to switch to pay-per-performance (or the other way around), we can switch at the start of any month. Just let us know.

## 09 Service Scope

*What's included across all four offers. The full stack, end to end, with the team owning every layer.*

|                     |                                                                                                                                                                                 |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Lead Sourcing       | <b>Market research, list building, and prospect scraping across multiple sources. Lists are rebuilt and refreshed every campaign so you never burn the same contacts twice.</b> |
| Data Enrichment     | <b>First name, last name, company, role, and LinkedIn URL on every contact. The richer the data, the more personalized the outreach.</b>                                        |
| Verification        | <b>Every email is verified before it ever lands in a campaign. Bounces destroy deliverability, so we cut them off before they start.</b>                                        |
| Copywriting         | <b>Full email sequence written, tested, and owned end to end. Multiple angles tested side by side, rewritten the moment reply rates start to drop.</b>                          |
| Infrastructure Mgmt | <b>Sending platform, dedicated domains, mailboxes, and deliverability warm-up. You own the tools; we run them for you.</b>                                                      |
| Campaign Management | <b>Daily ops, send volume management, ICP refinement, and continuous optimization. If something stops working, we change it before you have to ask.</b>                         |
| Reply Handling      | <b>Pay-per-appointment and appointments retainer: managed by our SDR. Pay-per-lead and leads retainer: handled by you with real-time notifications.</b>                         |
| Reporting           | <b>Sends, reply rates, qualified leads, deliverability health, and every optimization we make along the way. Full visibility, no black box.</b>                                 |

## 10 Recent Results

Snapshots from campaigns we have run over the past year, across different verticals. Not a performance guarantee — just a sense of what the model produces when the fit is right.

### PEAK PERFORMANCE — B2B SAAS · 2025

**2,957 sequences · 17.1% reply rate · 47.9% positive reply rate · 242 opportunities · \$242,000 in pipeline**

*The strongest single campaign we've ever run. A 17.1% reply rate is well above what's considered industry-leading (most agencies treat 3-5% as a solid benchmark).*

### B2B SAAS

**39,300 emails sent · 4.14% reply rate · 106 opportunities · \$106,000 in pipeline**

## MARKETING AGENCY

**3,351 sequences · 5.94% reply rate · 28.14% positive reply rate · 56 opportunities · \$56,000 in pipeline**

*Smaller list size, tighter ICP, higher conversion.*

## COACHING & CONSULTING

**19,400 emails sent · 27 opportunities · \$78,000 in pipeline**

*Higher ticket size, fewer leads needed to make the math work.*

## B2B SERVICE BUSINESS

**1,399 sequences in 3 days · 2.43% reply rate · 38.24% positive reply rate · 13 opportunities · \$39,000 in pipeline**

## OUR OWN PIPELINE · MAY 2026

1-14 of 14

*We use cold email to sell cold email. Every choice in the system (deliverability setup, ICP targeting, sequence design) gets validated on us before it ever runs for a client. If the model wasn't working, we'd see it on our own pipeline first.*

## 11 Next Step

*That's the offer. Whenever you're ready, let's talk.*

That's the offer. Whenever you're ready, let's talk. Thanks for reading through this. If anything raised a question, or you want to talk through how this might look for your business, just reach out.
